*The FD freeze-drying technology, also known as vacuum freeze-drying, is abbreviated as "FD" in English. Under a temperature range of -30 to -50 degrees Celsius and in a vacuum environment, using the sublimation principle, compared with techniques such as air-drying, dehydration, low-temperature frying, and hot drying, the most significant feature of freeze-dried food is that it retains the color, aroma, taste, shape of the product, as well as the nutritional*

*The company has obtained FDA registration in the United States and has passed the OU dual certification, FSSC22000 system certification, USDA organic certification in the United States, German BCS organic certification, EU BRC certification, HACCP food safety system certification, and ISO9001:2015 quality system certification.*

***Mainly exported to Europe, America, Japan, South Korea, Southeast Asia, and other countries***
